Exam Structure

The following portion of the examination includes 1 Case Study. The Case Study includes introductory information about a specific situation, followed immediately by a set of questions related to the situation described.

Each question will contain a button that is labeled **Scenario**. When clicked, the scenario button will redisplay the introductory information.

Each new question will be presented on-screen with the text of each previous question to aid the candidate. New questions will appear in bold. Previous questions will appear in italics.

Certain questions will require a single response and others will require multiple responses so please ensure you read the question carefully.

When finished reading the question, click on the **NEXT** button to move to the next question on the exam.

Question 2

Progress 40%

Mrs. Tsang has been experiencing a lot of pain lately due to the rheumatoid arthritis. The registered nurse on the team has been trying different medications for pain relief. During the morning report, the registered nurse asks Edna how Mrs. Tsang is doing. In addition to reporting her observations about Mrs. Tsang's personal care abilities, which one of the following should Edna report on?

After the report, Edna asks Mrs. Tsang how she is feeling. Mrs. Tsang replies that her arthritis is "very bad" this morning and that she can hardly move because of the pain. Mrs. Tsang gives Edna a detailed description of the pain. Which one of the following should Edna do next?

? Scenario   ? Calculator

A | Observe Mrs. Tsang's body language, then report to the nurse.

B | Contact the physician to change Mrs. Tsang's medication orders.

C | Assist Mrs. Tsang with gentle stretching exercises to help relieve the pain.

D | Report pain information to the nurse after assisting Mrs. Tsang with personal care.

Question 3

Progress ▮▮▮▮▮▯▯▯▯ 60%

Mrs. Tsang has been experiencing a lot of pain lately due to the rheumatoid arthritis. The registered nurse on the team has been trying different medications for pain relief. During the morning report, the registered nurse asks Edna how Mrs. Tsang is doing. In addition to reporting her observations about Mrs. Tsang's personal care abilities, which one of the following should Edna report on?

After the report, Edna asks Mrs. Tsang how she is feeling. Mrs. Tsang replies that her arthritis is "very bad" this morning and that she can hardly move because of the pain. Mrs. Tsang gives Edna a detailed description of the pain. Which one of the following should Edna do next?

Edna reports her observations to the registered nurse. The registered nurse provides Mrs. Tsang with some medication to relieve the pain. She asks Edna to assist Mrs. Tsang with her care after the medication has taken effect. Edna waits for about half an hour and then assists Mrs. Tsang with her morning care. Mrs. Tsang is no longer complaining of pain and is able to move around with little discomfort. As Edna assists with her personal care, Mrs. Tsang appears extremely tired and she forgets Edna's name twice, which is unusual. Which three of the following points should Edna immediately report to the nurse after care?

| ? | Scenario | ? | Calculator |

A Mrs. Tsang appeared extremely tired during care.

B Mrs. Tsang had complained of pain before pain medication was given.

C Mrs. Tsang forgot Edna's name twice during care.

D Mrs. Tsang did not complain of pain during care.

E Mrs. Tsang understood medication results.

F Mrs. Tsang had specific medication response time.
